

Stripping of Surface Globulin in Mouse Cells

SEE: Loos, Forni, and Perris. The dynamic state of the lymphocyte membrane. Factors affecting the distribution and turnover of surface immunoglobulins.
European Journal of Immunology 2:203 1972

Michael Julius has done a time study with cultured mouse spleen to see how many hours postculture all surface globulin is shed. Ask him for details

① 1 hour surface globulin was down to 20%

② 6-8 hours surface globulin stained before culture is gone
